

1. General Statement

1,2,3,4-Tetra Chloro Benzene is a colourless crystalline solid. Combustible substance, poorly flammable. Practically insoluble in water. Acute or chronic health hazards result from the substance. The substance is hazardous to the aquatic environment. Here is a risk of a dust explosion if the following conditions are met: The substance is given in a very finely distributed form (powder, dust), whirled up in sufficient quantity in the air, An ignition source is present (flame, spark, electrostatic discharge, etc.)

2. Chemical identification.

Name : 1,2,3,4-Tetra Chloro Benzene
CAS number(s) : 634-66-2
EC number : 211-214-0
Molecular formula : C₆H₂Cl₄
Structure :

3. Uses and Benefits

It is used in Chemical intermediate and also used as Dielectric fluids.

4. Physical / chemical properties

Property	Value
Physical state :	Solid
Colour :	Colourless-white
Odour :	Odourless
pH :	No data available
Melting point :	47 °C
Boiling point :	254 °C
Flash point :	155 °C
Density :	1.73 g/cm ³ at 20 °C

GPS Safety Summary

1,2,3,4-Tetra Chloro Benzene

CL-4:PUBLIC

Solubility in Water:	< 0.1 g/100ml
----------------------	---------------

5. Health Effects

Effect Assessment	Result
Acute toxicity (Oral / inhalation / dermal)	Toxic if swallowed,
Irritation / corrosion Skin / eye/ respiratory tract	NA
Respiratory or skin sensitisation	NA
Toxicity after repeated exposure Oral / inhalation / dermal	NA
Genotoxicity / Mutagenicity	NA
Carcinogenicity	NA
Toxicity for reproduction	NA

6. Environmental Effects

Effect Assessment	Result
Aquatic toxicity	Yes
Fate and behavior	Result
Persistence and degradability	Not readily biodegradable in water.
Bioaccumulative potential	High potential for bioaccumulation (BCF > 5000).

7. Exposure

Human health

1,2,3,4-Tetra Chloro Benzene is very toxic to aquatic life, is very toxic to aquatic life with long lasting effects and is harmful if swallowed. Caution! Substance is absorbed through the skin. EXPOSURE TO HIGH CONCENTRATIONS: Irritation of the respiratory tract. Irritation of the nasal mucous membranes. Irritation of the eye tissue. AFTER INGESTION OF HIGH QUANTITIES: Dizziness. Vomiting. Nausea. Diarrhoea. Disturbances of consciousness. The exposure must be kept as minimum as possible by the use of appropriate risk management measures suitable collective and personal protective equipment, good industrial hygiene practices and risk communication through appropriate training of workers. Careless handling or accidental spillage of the chemical could result in exposure to potentially hazardous levels of chemicals. Industrial workers should ensure that they follow the advice found in the extended safety data sheet (SDS).

GPS Safety Summary

1,2,3,4-Tetra Chloro Benzene

CL-4:PUBLIC

Environment

Care should be taken to avoid releases of these products to sewage, drainage systems and water bodies. Spillage shall be quickly collected in the event of an accidental release. More information about release measures and accidental release measures are available in the extended safety data sheet.

8. Risk Management Recommendations

Human health measures

Organizational	A basic standard of occupational hygiene is recommended. Ensure operatives are well informed of the hazards and trained to minimise exposures. Ensure regular inspection and maintenance of equipment and machines. Handle and store according to the indications of the Safety Data Sheet.	
Protection	Eye protection:	Safety glasses (EN 166). In case of dust production: protective goggles (EN 166)
	Skin and body protection:	Protective clothing (EN 14605 or EN 13034)
	Respiratory protection:	Dust formation: dust mask. On heating: Full face mask with filter type A
Engineering controls	Ensure good ventilation of the work station.	
Environment protective measures		
Avoid release to the environment		

9. First-aid measures

First-aid measures after inhalation:Remove the victim into fresh air.

First-aid measures after skin contact:Soap may be used. Do not apply (chemical) neutralizing agents without medical advice. Remove clothing while washing.

First-aid measures after eye contact:Rinse immediately with plenty of water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Do not apply (chemical) neutralizing agents without medical advice.

First-aid measures after ingestion :Rinse mouth with water. Immediately after ingestion: give lots of water to drink. Ingestion of large quantities: immediately to hospital. Call Poison Information Centre (www.big.be/antigif.html).

10. Fire-fighting measures

Extinguishing media

Suitable extinguishing media: Quick-acting ABC powder extinguisher. Class A foam extinguisher. Water (quick-acting extinguisher, reel). Water. Class A foam.

Unsuitable extinguishing media : Quick-acting BC powder extinguisher. Quick-acting CO2 extinguisher.

Special hazards arising from the substance or mixture

Hazardous decomposition products in case of fire: On heating/burning: release of toxic and corrosive gases/vapours (hydrogen chloride, phosgene, carbon monoxide - carbon dioxide).

Advice for firefighters

Precautionary measures fire : Exposure to fire/heat: keep upwind. Exposure to fire/heat: consider evacuation. Exposure to fire/heat: have neighbourhood close doors and windows.

Firefighting instructions: Dilute toxic gases with water spray. Take account of toxic fire-fighting water. Use water moderately and if possible collect or contain it.

11. Accidental release measures

Protective equipment : Gloves (EN 374). Safety glasses (EN 166). Protective clothing (EN 14605 or EN 13034). Dust cloud production: self-contained breathing apparatus (EN 136 + EN 137).

Environmental precautions: Prevent soil and water pollution. Prevent spreading in sewers.

For containment : Contain released product, collect/pump into suitable containers. Plug the leak, cut off the supply. Dam up the solid spill. Knock down/dilute dust clouds with water spray. Powdered form: no compressed air for pumping over spills.

12. Disposal consideration

Regional legislation (waste) : Disposal must be done according to official regulations.

Waste treatment methods : Dispose of contents/container in accordance with licensed collector's sorting instructions.

Sewage disposal recommendations : Disposal must be done according to official regulations.

13. Handling and storage

GPS Safety Summary

1,2,3,4-Tetra Chloro Benzene

CL-4:PUBLIC

Precautions for safe handling: Avoid raising dust. Keep away from naked flames/heat. In a finely divided state: use spark-/explosionproof appliances. Finely divided: keep away from ignition sources/sparks. Measure the concentration in the air regularly. Carry operations in the open/under local exhaust/ventilation or with respiratory protection. Comply with the legal requirements. Remove contaminated clothing immediately. Clean contaminated clothing. Do not discharge the waste into the drain. Powdered form: no compressed air for pumping over. Keep the container tightly closed.

Hygiene measures : Observe strict hygiene.

14. Classification and Labeling

Hazard pictograms (GHS US)

:

Signal word (GHS US)

Hazard statements (GHS US)

Precautionary statements (GHS US)

: Warning

: H302 - Harmful if swallowed

: P264 - Wash hands, forearms and face thoroughly after handling.

P270 - Do not eat, drink or smoke when using this product.

P301+P312 - If swallowed: Call a poison center or doctor if you feel unwell.

P330 - Rinse mouth.

P501 - Dispose of contents/container to hazardous or special waste collection point, in accordance with local, regional, national and/or international regulation.

15. Conclusion

1,2,3,4-Tetra Chloro Benzene is a colourless crystalline solid. Combustible substance, poorly flammable. Practically insoluble in water. Acute or chronic health hazards result from the substance. The substance is hazardous to the aquatic environment. Here is a risk of a dust explosion if the following conditions are met: The substance is given in a very finely distributed form (powder, dust), whirled up in sufficient quantity in the air, An ignition source is present (flame, spark, electrostatic discharge, etc.). Care should be taken to avoid releases of these products to sewage, drainage systems and water bodies. The exposure must be kept as minimum as possible by the use of appropriate risk management measures as suitable collective and personal protective equipment, good industrial hygiene practices and risk communication through appropriate training of workers.
